

CAM – Moving integration from iManage on-prem to Cloud

Description

Provides assistance and guidance in moving CAM's data integration from iManage on-prem to the iManage Cloud.

Pain Points

Firms face the following risks when repointing CAM to their new Cloud:

- **Delayed productivity** – When moving to the cloud, the goal is to have little to no interruption to workspace creation and management so Attorneys can do their work.
- **Operational setbacks/Operational continuity** – Coordination for your data migration to cloud can be time consuming for your internal teams. Litera can assist with the connections and data mapping in CAM to allow the IT team focus on the larger work efforts.
- **Operational stability** – Ensuring that all new systems are connected properly will allow your move to iManage Cloud be seamless and worry free. We will ensure that all workflows and metadata are properly mapped when moving from on-prem to iManage Cloud.

Outcomes/Benefits

- **Consulting on cut over process** – Litera services team will review cut over plans and offer guidance on how it will affect CAM for data ingestion and down stream systems.
- **Cost & Time Savings** – Swift return to business-as-usual following cut over to cloud. Litera will review and assist with the connections to the new DMS.
- **Enhanced Skills** – When reviewing the new connections and metadata mapping, Litera team will review the new connections and process changes.
- **Optimized Performance** – As part of the process, Litera will review any scripting for workspace provisioning and ensure that all scripts are executing in an efficient manner.

Firm Resources Required

IT Team – Provide access and administrative permissions to firm's CAM environment and Data Uploader servers. (If Needed).
